

June 5, 2009

Dear friends,

The Isha Foundation would like to congratulate the 2009 ALOHA Mind Math Olympiad participants and express our gratitude to Aloha USA for giving us the opportunity to participate in the conference.

As Sadhguru, founder of Isha foundation, says, "The basic purpose of life, the basic purpose of education is to enhance the boundaries of one's perception". ALOHA's vision to provide innovative education and to unleash the power inherent in the human mind by providing whole brain development training is commendable and we wish you all the very best in your efforts.

Clearly our work is supportive of yours as per Sadhguru, "True human capabilities will find expression only in absolute relaxation. Your mind, your body will work best, will find fullest expression, only when you are joyful and peaceful and quiet within yourself." To this effort, Isha Foundation has been established as a means to impart the science of *Inner Engineering*, to manage our inner world as effectively as we have learned to manage the external world.

Again our best wishes to the participants and our commendation to the support of the parents and educators involved.

Sincerely,
Gomathy Swamy
Inner Engineering Teacher
